## **Jolla and F-Secure Join Forces to Offer younited, the Trusted Cloud Service to Jolla Users**

**HELSINKI, Finland – February 21, 2014 – Jolla, the Finnish smartphone and Sailfish OS developer and F-Secure, the Finnish cloud security software expert, today announced a cooperation: all Jolla smartphone users will soon have the opportunity to utilize younited by F-Secure, a trusted and secure cloud storage service.**

Jolla and F-Secure are currently working in cooperating to make younited a best fit for the needs of Jolla users. The upcoming solution will put Jolla smartphone owners back in control of their digital belongings by giving them gigabytes of cloud storage for quick and easy backup, storing, and sharing. It will also feature a straightforward signup to younited from the smartphone. Users will be able to access stored Jolla content from other devices connected to younited, such as tablets, Macs or PCs.

“Jolla and F-Secure want to make sure Jolla phone users have a secure choice to back-up and share their on-device content. We are both very passionate about privacy and security, which is why our cooperation is natural and fruitful. As a plus, both companies are from Finland, a leading country in security and privacy,” Jolla’s CEO **Tomi Pienimäki** comments.

“We believe that our new secure cloud service younited is a perfect fit for Jolla, because we both are very serious about privacy. Jolla is the new smartphone from Finland, and we are very proud of this cooperation,” comments **Timo Laaksonen**, Vice President, Content Cloud, F-Secure.

The younited cloud service for Jolla users will be made available soon.

## **About Jolla**

Jolla Ltd., headquartered in Helsinki, Finland, is developing mobile devices and the open operating system, Sailfish OS, based on the heritage of Nokia's MeeGo project.

Jolla was born in 2011 out of passion of its founders towards open innovation in the mobile space. At the core of Jolla is Sailfish OS, the most modern, mobile-optimized operating system. Running on Sailfish OS we are creating mobile devices, which are designed with the most recent consumer needs in mind, such as intuitive gesture use, multitasking and effortless interaction.

We believe that the best way of creating something meaningful is DIT, Doing It Together. Since the beginning, the community has been at the heart of our idea generation, technology development and distribution. Continuous, open dialogue with the community is the way forward.

Jolla has offices in Helsinki (HQ) and Tampere, Finland and Hong Kong, SAR of China.
